These and other goals have been incorporated into publications describing the objectives for medical ethics education, the most recent being the Romanell Report. In this report, the authors propose that the objective for medical ethics education should be...

Pediatric Surgery International is a journal devoted to the publication of new and important information from the entire spectrum of pediatric surgery. The major purpose of the journal is to promote postgraduate training and further education in the surgery of infants and children. The contents will include articles in clinical and experimental surgery, as well as related fields. Source material for this Alcohol Alert originally appeared in Pediatrics: Official Journal of the American Academy of Pediatrics. April 2008, Volume 121, Supplement 4. For more information on underage drinking, see also: Alcohol Research & Health 32(1) focuses on underage drinking, and on how the process of human development (i.e., the changes that occur as young people age) influences underage drinking behavior. Copies of the Alcohol Alert are available free of charge from the National Institute on Alcohol Abuse and Alcoholism Publications Distribution Center P.O. Box 10686, Rockville, MD 20849-0686.
