I have used these terms for readability and not because I believe that every man who has problems with angry or controlling behaviors is abusive. I needed to select a simple word I could apply to any man who has recurring problems with disrespecting, controlling, insulting, or devaluing his partner, whether or not his behavior also involves more explicit verbal abuse, physical aggression, or sexual mistreatment. Any of these behaviors can have a serious impact on a woman’s life and can lead her to feel confused, depressed, anxious, or afraid. So even if your partner is not an abuser, you will did not understand what it mean by supervising process. systemctl status shiny-server.service — shiny-server.service - ShinyServer Loaded: loaded (/etc/systemd/system/shiny-server.service; enabled; vendor preset: disabled) Active: active (running) since Thu 2018-07-05 16:01:23 AEST; 5s ago Process: 16121 ExecStopPost=/usr/bin/sleep 5 (code=exited, status=0/SUCCESS) Process: 16125 ExecStartPost=/usr/bin/sleep 3 (code=exited) We'll most likely not notice when it exits.
