INDEX 226
U.S. study abroad programs are increasingly diverse in their curricula, living arrangements, and locations. More and more programs offer a so-called full curricula that includes many of the traditional academic disciplines. Those that focus on language, culture, and social science subjects tend to be in foreign language countries, especially those of the less commonly taught languages in East Asia, North Africa, the Middle East, and eastern Europe.

Comparative Education Review. This book describes how to structure study abroad to bridge the separation of academic learning from experiential and intercultural learning; and integrate study abroad with the undergraduate curriculum. Buy the eBook. List Price.
