Anne & Scope
JITED is a peer-reviewed journal, focuses on international economics, economic development and, more importantly, the interface between trade and development. The links between trade and development economics are critical at a time when both fluctuating commodity prices and trade liberalization and agreements can radically affect the economic development agenda.

JITED is designed to meet the needs of international development economists, economic historians, applied economists and policy makers. The international experts who make up the journal’s Editorial Board encourage contributions from economists worldwide.

JITED issues:
- Theoretical and applied issues in international and development economics
- Macroeconomic analyses of trade and development issues based on sound theoretical economic models or testing fundamental economic hypotheses
- Models of structural change
- Trade and development issues in economics in Eastern Europe, Asia and the Pacific area

6. Submissions should include a reference list, in alphabetical order, at the end of the article. The content and format should conform to the following examples.

Book:
Industrial structure: Capital markets and the origins of British economic decline. Cambridge: Cambridge University Press.

Article in Journal:
The Economic History Review
Edited text:

Multiple authors:

7. For any other matters of presentation not covered by the instructions to contributors, authors should prepare and upload two versions of their manuscript. One should be a complete text, while in the second all data identifying the author should be removed from files to allow them to be sent anonymously to referees. When submitting files authors will have the ability to define the non-human-readable version as ‘File not for review’ when submitting your manuscript, please upload all of your original source files.

8. On acceptance for publication, authors will be requested to submit their manuscript in accordance with these conventions. Our aim is rapid publication; this will be helped if authors follow the above instructions, and return their page proofs to the editor on the date requested.

9. Corresponding authors will receive free online access to the journal and a complimentary copy of the issue containing their article. Authors are responsible for obtaining permission to reproduce copyright material from other sources.

10. In a condition of publication that authors assign copyright or license the publication rights in their articles, including abstracts, to Taylor & Francis. This enables us to ensure full copyright protection and to disseminate the article, and of course the Journal, to the widest possible readership in print and electronic formats as appropriate. Authors retain many rights under the Taylor & Francis rights policies, which can be found at www.informaworld.com/authors_journals/copyright_position. Authors are therefore responsible for obtaining permission to reproduce copyright material from other sources.

11. Corresponding authors will receive free online access to their article through their institutional subscription. If the article is cited in other journals, authors will need to obtain the requisite permissions. If you have any queries, please contact our reprints department at reprints@tandf.co.uk.
International economics is concerned with the effects upon economic activity from international differences in productive resources and consumer preferences and the international institutions that affect them. It seeks to explain the patterns and consequences of transactions and interactions between the inhabitants of different countries, including trade, investment and transaction. International trade - Economic integration: The economic integration of several countries or states may take a variety of forms. The term covers preferential tariffs, free-trade associations, customs unions, common markets, economic unions, and full economic integration. The parties to a system of preferential tariffs levy lower rates of duty on imports from one another than they do on imports from third countries. Although economic integration occurred before political unification, it would not have been possible had not many difficulties been swept away by irresistible pressure from Prussia with its military victories.
